

# ACQUAPURO

UK's largest range of high quality three way mixer taps

## Acquapuro; UK's largest range of high quality three way mixer taps.

Acquapuro mixers are manufactured to the highest standard using quality components. Our range has been designed with care and elegance and includes simplified installation solutions and technologies to ensure longevity operation.

This collection of beautifully designed three way mixers has been created to provide customers with a wide variety of choice, all at very reasonable prices.

### SQ

A square body three lever three-way tap with seven spout options.  
The SQ is available in chrome and brushed steel.

### Aquila & Milano

Contemporary styled professional mixers featuring pull down spring spouts with a two way spray head.  
The Aquila has black and white silicone hose options.

### Monza, Verona and Sorrento

A highly desirable range of classic three way taps.  
Quad spout, swan-neck or European dual flow spout options.  
Two and three lever models available.

### Aquila 4-in-1 Hot Water Tap

Our new 98 degree hot water four-way tap with dedicated outlets for both 98 degree and filtered water.  
Pull down spout with three finish options and a 3.0L storage tank.

### Filters & Softeners

A four stage in-line micro-plastics filter which uses the FX head.  
A carbon and scale control in-line filter and a non-electric water softener.

### Side Sprays

With or without thermostatic control.  
Progressive lever giving increased flow control. 1.2m weighted hose and three finish options.

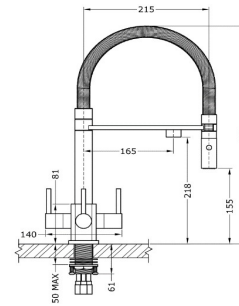

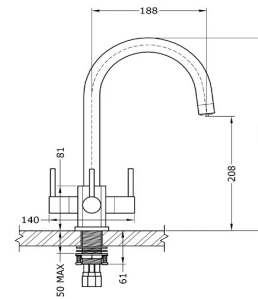

# SQ

The SQ is a range of three way taps that feature a square body and three identically sized circular handles. The edges of the SQ body have been gently machined resulting in a sophisticated and professional look. All of our seven spout options are available, details below.

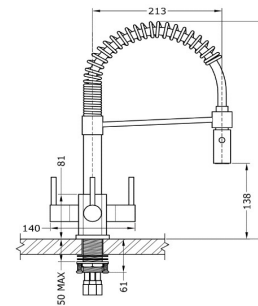

Aquila SQ chrome, chrome/black & chrome/white

Monza SQ chrome

Sorrento SQ chrome

# SQ

The SQ is a range of three way taps that feature a square body and three identically sized circular handles. The edges of the SQ body have been gently machined resulting in a sophisticated and professional look. There are five spout options in brushed steel, details below.

Aquila SQ brushed steel

Verona SQ brushed steel

Milano SQ brushed steel

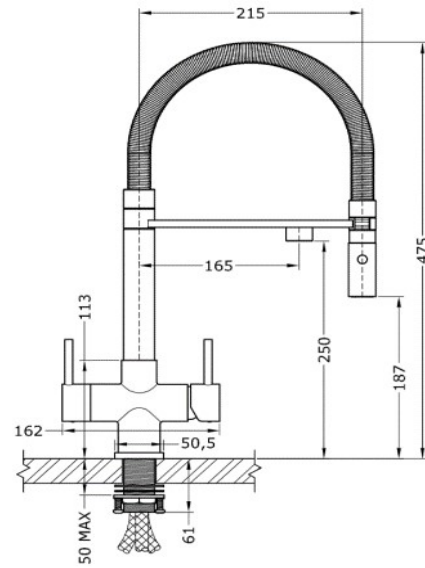

# Aquila 2 lever

The Aquila, a professional look, but with a tightly wound spring for a softer finish. The Aquila still offers the same practicality as the Milano, but includes a treated water outlet neatly hidden in the underside of the spray holder. Black or white silicone hose options are available.

Aquila 2 lever chrome

Aquila 2 lever chrome and black/white

Aquila 2 lever brushed steel

Aquila 2 lever brushed steel and black/white

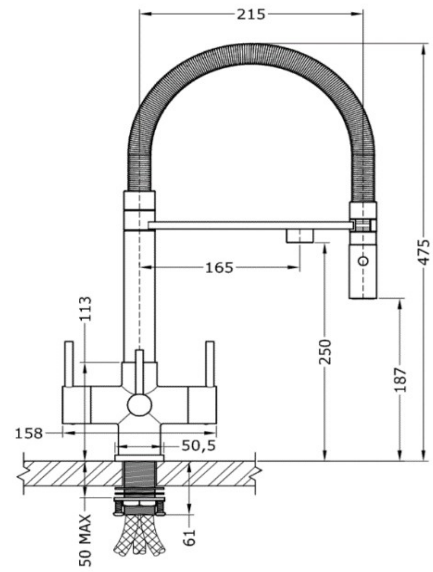

# Aquila 3 lever

The Aquila, a professional look, but with a tightly wound spring for a softer finish. The Aquila still offers the same practicality as the Milano, but includes a treated water outlet neatly hidden in the underside of the spray holder. Black or white silicone hose options are available.

Aquila 3 lever chrome

Aquila 3 lever chrome and black/white

Aquila 3 lever chrome and white

Aquila 3 lever brushed steel

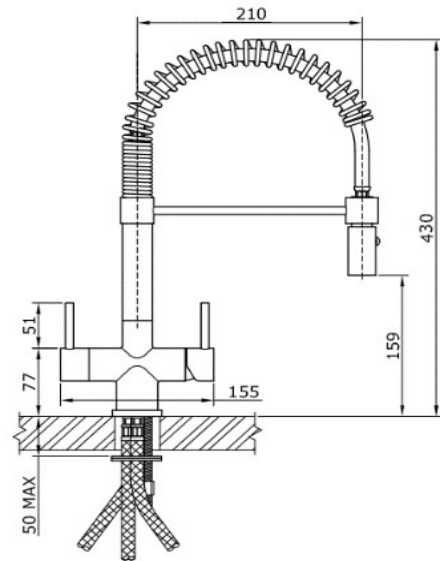

# Milano 2 and 3 lever

The Milano is highly desirable, it combines contemporary styling with functionality thanks to the professional spring spout. The detachable spout end will ensure water can reach all the areas a normal tap cannot and with the press of a button deliver a shower spray for washing down.

Milano 2 lever chrome

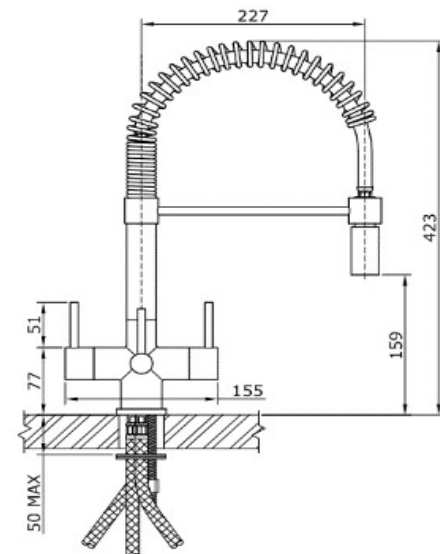

Milano 2 lever brushed steel

Milano 3 lever chrome

Milano 3 lever brushed steel

# Verona 2 and 3 lever

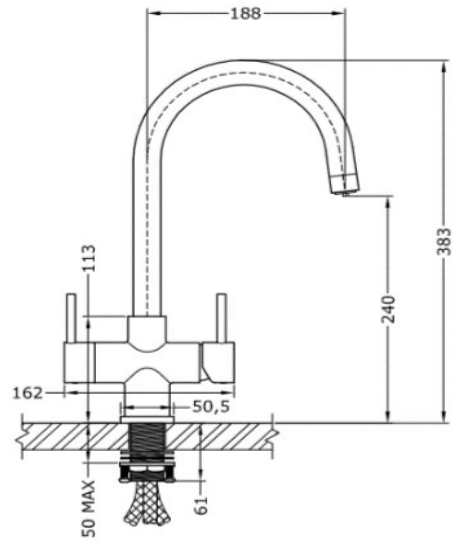

The Verona is highly desirable, it combines functionality with timeless styling. A curved swan-neck spout is a popular feature, making the Verona one of our best sellers. The swivel spout is dual flow, a dedicated tube ensures treated water remains separate all the way from the connections to the dual opening aerator.

Verona 2 lever chrome

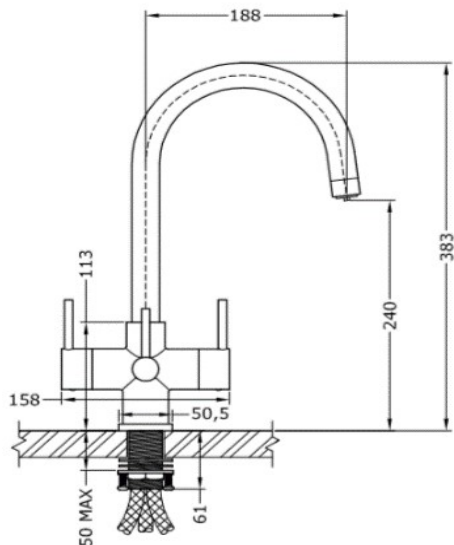

Verona 2 lever brushed steel

Verona 3 lever chrome

Verona 3 lever brushed steel

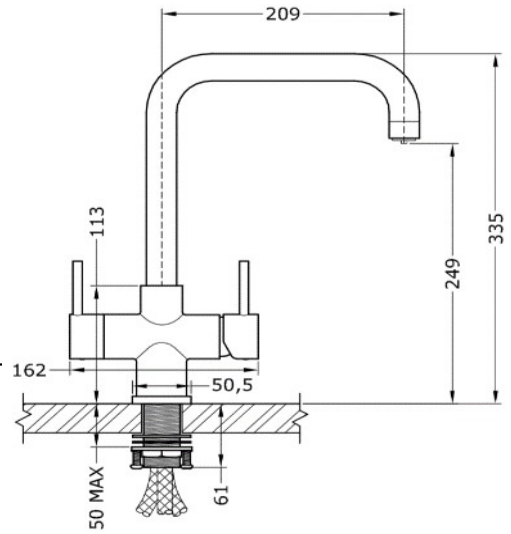

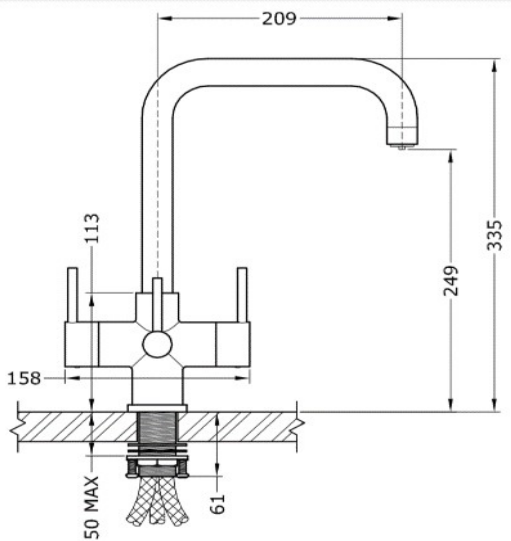

# Monza 2 and 3 lever

The Monza is super contemporary thanks to its double curved quad spout. The angular design, combined with dual flow technology, which is unusual for this spout design, means the Monza will compliment any modern kitchen.

Monza 2 lever chrome

Monza 3 lever chrome

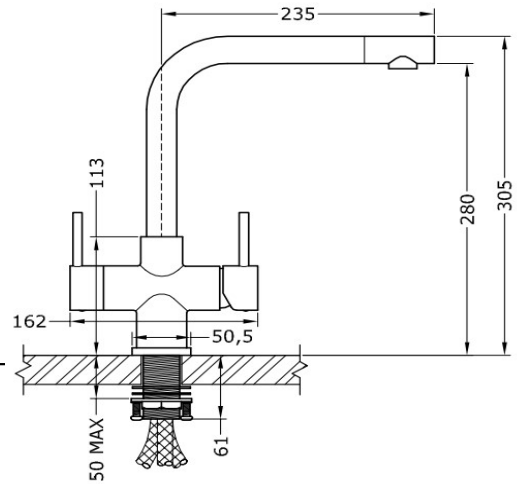

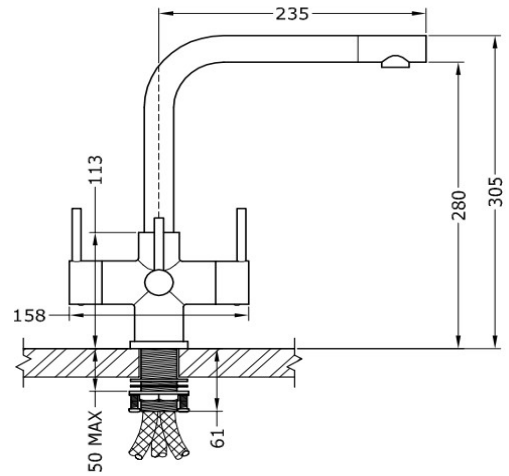

# Sorrento 2 and 3 lever

The Sorrento features a single curved, flat topped spout which ends with two one dual flow aerator located in the underside of the spout tip. This design is very popular in Europe, a very fashionable product for any contemporary kitchen.

Sorrento 2 lever chrome

Sorrento 3 lever chrome

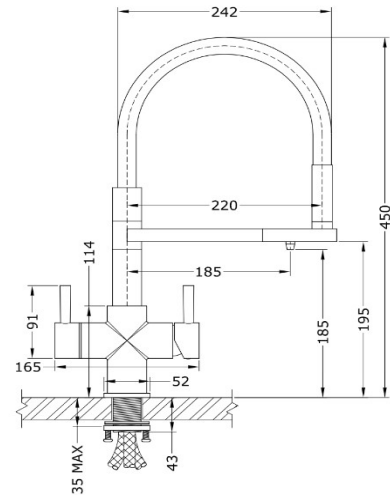

# Aquila 4-in-1

The Aquila 4 in 1 features conventional hot and cold water, plus 98° and filtered water, all delivered from this beautifully designed contemporary two lever tap. The spout end is detachable and the 3.0L WRAS approved 98° hot water tank has 7 temperature modes and an Eco-mode.

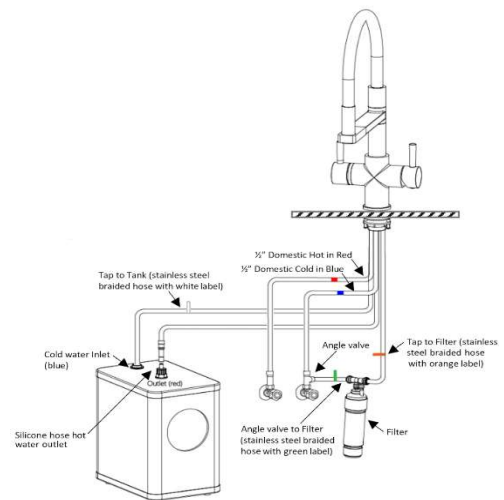

Aquila 4-in1 chrome and black

Aquila 4-in1 brushed steel and black

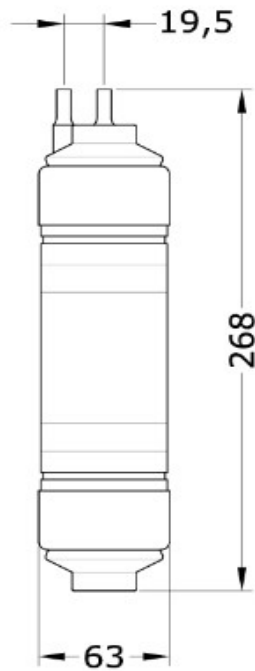

Aquila 4-in1 matt black

# Filters

Acquapuro three way taps can be used with any type of filter as all of our products have three separate water connections. We do however offer two filter options with varying performance depending on requirements. Both filters use a carbon block, more specific details on their performance can be seen below.

Acquapuro ACQ-IFC+

The ACQ-IFC+ uses the highest quality 1 micron carbon block with added polyphosphate crystals for scale prevention. This guarantees customers will have great tasting drinking water.

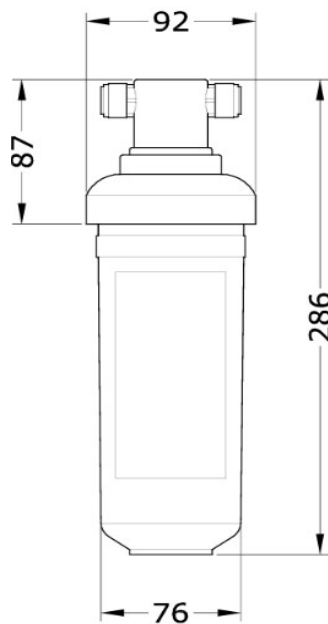

1/4" push fit pipework attachments allow for a quick, dry filter change with no specialist tools.

1 micron carbon block removes Class 1 particulates, chlorine, cysts, pesticides, insecticides, detergents and other toxins.

Polyphosphate crystals prevent limescale formation, giving clear drinking water.

Life Span; Recommended 6 months.

Acquapuro ACQ-0.IFC

The ACQ-0.IFC has the highest quality NSF certified 0.5 micron carbon block, plus a 4 stage filtration process. This guarantees customers will have great tasting, clean drinking water.

**Stage 1:** Water passes through a 4 stage felt process for removal of solids such as sand, rust, and dirt.

**Stage 2:** High quality carbon block (rated 0.5 micron) helps remove class 1 particulates such as Chlorine, to improve the taste and odour of water.

**Stage 3:** Silver ions impregnated in the carbon block are released, acting as an antibacterial.

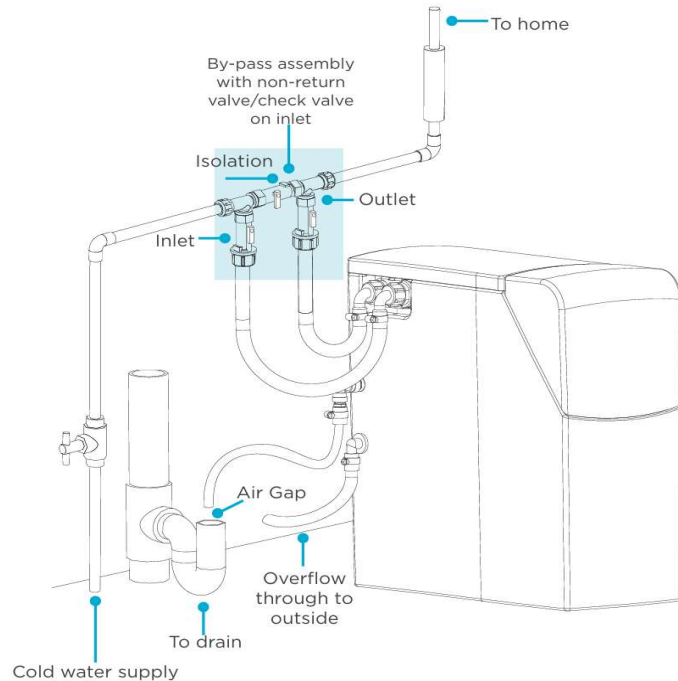

**Stage 4:** A hollow 0.1 micron membrane to remove ultra bacteria such as E.coli, Pseudococcus aureus and yellow staphylococcus.

Life Span; Recommended 12 months.

# Softeners

We currently only offer one water softener, the Kinetic SuperSoft Highflow which is powered purely by water making it easy to install with no tricky settings, adjustments or risk of malfunctions. The SuperSoft monitors water use and only processes the water you need, eliminating waste and reducing energy use.

Kinetic SuperSoft Highflow

- Dimensions:

Width - 215mm

Height - 495mm

Depth - 475mm

## TWIN-TANK DESIGN

The SuperSoft is one of the most compact and efficient water softeners available; it even fits under your kitchen sink. Designed and patented with the first twin cylinder non-electric tank. It guarantees maximum efficiency and provides continual soft water at full flow 24/7.

## SOFT WATER RINSE

Every operation the SuperSoft makes is carried out in soft water, so our system works better and lasts longer, saving you money and keeping them out of landfills. SuperSoft technology has been known to last for over 30 years and comes with a 5-year guarantee.

## JUST ADD SALT

All you need to maintain your SuperSoft system is salt. Simply top up with salt blocks when required and it's ready to go.

# Side Sprays

Acquapuro side sprays can be used independently, either connected to the hot or cold water supply depending on the customers requirements, or they can be used with our worktop mounted thermostatic valve for hot and cold water. The side sprays have a progressive lever ensuring smooth water flow.

# Technology

Acquapuro mixers have been intelligently designed, the manufacturing process takes every element of the mixer tap into consideration. Particular attention has been focused on quality combined with practicality, this results in an easy to install product with trouble free operation. Additional information below.

## Spout Features:

**Anti-wobble technology:** Acquapuro swivel spouts are fitted with a nylon guide ring which ensures a smooth rotation and a solid connection to the main body.

**Leak Free:** All spouts are fitted with a double pair of O-rings to ensure a leak free connection. Combined with the guide ring, we believe these O-rings should last 10 years.

**Dual Flow:** A dedicated tube keeps treated water completely separated all the way from the hose connections to the dual opening aerator at the spout end. The only exception is our Milano, which has been designed to have a mixed water outlet.

## Body Features:

**Solid fix Installation Method:** A faster way to install the mixer tap. A large nut spins up a threaded shaft which is then tightened by two screws. This offers support over the full circumference of the base. A stronger installation even on the thinnest of stainless steel sinks.

**Components:** Only the highest quality ceramic cartridges, valves and aerators to ensure trouble free operation.

## Additional Features:

All Acquapuro mixers have three separate flexible hose connections meaning they can be used with either a filter system, reverse osmosis or a water softener.

All three hoses are 450mm long with a 3/8" connection. A 3/8" x 1/2" non return valve is included, which connects to a 15mm compression fitting.

These features are only applicable to Acquapuro three taps and not the Aquila 4-in-1 hot water tap.
